DETAILED ACTION

Election/Restrictions

1. Claims 4-6 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 12/9/05.

Drawings

2. The drawings, as originally filed, are acceptable as formal.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 13-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 13, line 4, the use of "its" renders the claim indefinite since it is not clear what this is referring to.

Claim 14, lines 2-3, the recitation "said bearing from its latched seat on said platform in its operation" is indefinite. This use of "its" is indefinite since it is not clear what this is referring to; and it is not clear what this recitation is requiring.

Claim Rejections - 35 USC § 102

Art Unit: 3682

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 13-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Roth et al. (5,358,266).

Roth et al. shows the claimed invention including a lever (47) which is operable from an engaged state to a disengaged state; the lever being mounted on a bearing (48 rotatably supports the lever, and is therefore a bearing surface); the lever is supported on a frame (14) which includes a platform (41 is planar and therefore a platform); the lever is actuated by either hand or a solenoid (68); the solenoid being attached to the lever via a link (49).

Allowable Subject Matter

7. Claims 1-3, 7-12 and 16 are allowed.
